

Ali Muhammad Hafeez Buttar

Cloud Infrastructure - DevOps - Cyber Security - Full Stack Development

London, UK - +44 07424412304 - alimuhammadhafeez@gmail.com

linkedin.com/in/ali-hafeez - github.com/Ali-Hafeez - ali-hafeez.xyz

PROFESSIONAL SUMMARY

A versatile and driven Computer Science graduate with a broad range of experience spanning cloud infrastructure, software development, cyber security, networking, education, security operations, and practical trades. I bring a rare combination of technical depth and real-world adaptability, having worked across government IT, fintech, e-commerce, community education, physical security, and construction environments. Passionate about problem solving in all its forms, from diagnosing infrastructure faults to writing automation scripts to teaching complex concepts clearly. Fully open to relocation anywhere in the UK, Europe, GCC, or internationally. Available for immediate full-time employment.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, VPC, IAM, CloudWatch), Microsoft Azure, multi-cloud environments

DevOps and CI/CD: GitLab CI/CD, GitHub Actions, Git workflows, pipeline automation, self-hosted runners

Infrastructure as Code: Terraform, Ansible concepts, 12 Factor App methodology

Containers and Orchestration: Docker (building images, Compose, containers), Kubernetes (learning)

Networking: TCP/IP, DNS, VLANs, routing and switching, OOB Management, Layer 1/2 troubleshooting, Wireshark, Cisco switches, enterprise WiFi

Security: Kali Linux, network security, CCTV diagnostics, incident response, ITIL v4

Programming and Scripting: Python, Bash, Java, JavaScript

Web and Database: React, Vite, Firebase (Firestore, Auth), HTML/CSS, SQL fundamentals

Operating Systems: Linux (RedHat/CentOS, Ubuntu, Debian, Kali), Windows Server, macOS

Monitoring: Prometheus, Grafana, CloudWatch, log analysis, alerting

Methodologies: ITIL v4, Agile/Scrum, Chaos Engineering, SRE principles

Languages: English (native), Arabic (learning), Spanish (GCSE Grade 9)

WORK EXPERIENCE

Associate Cloud Infrastructure Engineer - HM Revenue and Customs (HMRC) *Dec 2024 - Sept 2025*

- Gained extensive hands-on experience provisioning cloud infrastructure across AWS and Azure through structured lab work and mentor-led sessions, covering EC2, VPC, IAM, storage, and core networking concepts on both platforms.
- Supported CI/CD pipeline maintenance using Git workflows, contributing to deployment automation efforts and reducing manual errors.
- Administered Linux and Windows servers, writing Python and Bash scripts to support routine maintenance tasks.
- Developed practical knowledge of ITIL v4 incident management framework by working alongside experienced engineers during live incident response, change requests, and root cause analysis activities.
- Held a professional government role requiring consistent reliability, punctuality, and adherence to strict governance and security standards.

Freelance Technical Specialist - Self-Employed

Apr 2026

- Diagnosed a malfunctioning CCTV security system for a client through methodical fault isolation, correctly identifying an outdated compute box as the root cause rather than the hard drive, preventing a costly and unnecessary replacement.
- Independently planned, installed, and configured structured network cabling, ensuring clean cable management and verified end-to-end connectivity.
- Demonstrated practical, hands-on technical problem solving and the ability to deliver results independently for real clients.

Volunteer - Media and Content Creation - Community Organisation

Dec 2024 - Present

- Collaborate as part of a small creative team producing social media content, graphics, and multimedia assets to drive community engagement across the organisation's digital platforms.
- Contribute reliably on an ongoing basis demonstrating long-term commitment and creative initiative in a voluntary capacity.

Plumbing Apprentice - Private

Nov 2024 - Dec 2024

- Assisted a qualified plumber with practical installation and repair work including pipe fitting, soldering copper pipes, and system diagnostics.

- Performed hands-on diagnostics on water and gas pipe systems, developing a methodical approach to fault finding in physical infrastructure.
- Followed health and safety procedures at all times in a residential environment, communicating professionally with householders throughout.

Data Research and Entry Analyst - Cence Pay - UAE Client

Oct 2024

- Researched and entered granular data for bank cards and financial products across multiple UAE payment providers to power a fintech card comparison application.
- Ensured high accuracy and consistency across all records covering card benefits, fees, limits, and eligibility criteria for each provider.
- Managed a large, detailed workload independently and delivered results accurately and on time.

Administrator and Caretaker - Masjid Abu Bakr

Jun 2024 - Sept 2024

- Managed student attendance and examination records for a community educational programme, maintaining accuracy and confidentiality throughout.
- Maintained a safe, clean, and welcoming facility for community members of all ages, handling day-to-day administrative operations reliably.
- Acted as a trusted and responsible presence within a community setting, demonstrating integrity and professionalism.

Full Stack Developer - ClickPitch

Mar 2024 - Sept 2024

- Led end-to-end development of an MVP careers web application, independently translating the founder's vision into a fully functional, market-ready product.
- Engineered a responsive, high-performance front-end using React and Vite, ensuring excellent user experience across desktop and mobile devices.
- Built and managed the complete back-end on Firebase including Firestore database architecture, Authentication, and REST API integrations.
- Managed the full product lifecycle from requirements gathering through to deployment and iteration based on user feedback.

Computer Science Tutor (1-on-1) - Private

Oct 2023 - May 2024

- Planned and delivered personalised one-to-one Computer Science lessons to an A-Level student, identifying specific areas of weakness and adapting teaching style accordingly.
- Broke down complex topics including data structures, recursion, and Python programming into clear, accessible steps, resulting in measurable improvement in confidence and performance.
- Guided structured exam preparation through past paper sessions, focusing on technique and answer structure for maximum marks.
- Built a positive, encouraging learning relationship that transformed the student's attitude toward a subject they had previously found intimidating.

Door Supervisor - A2Z Security

Sep 2023 - Jan 2024

- Maintained safety and security at a major event venue using de-escalation techniques, clear communication, and confident public-facing conduct.
- Worked as part of a professional security team, demonstrating consistent reliability, punctuality, and a strong sense of responsibility under pressure.

Security Steward - Habib Security

Feb 2023 - Jun 2023

- Coordinated crowd safety and security operations for large-scale events of over 15,000 attendees including concerts and festivals.
- Worked effectively within a large team in a high-pressure, public-facing environment, demonstrating professionalism and composure throughout demanding shifts.

Door Supervisor and Online Tutor - Various

Jan 2022 - Jun 2022

- Worked in door supervision and security roles across venues and events, gaining early experience in crowd management, safety procedures, and customer-facing communication.
- Simultaneously provided online A-Level Computer Science tutoring, delivering personalised lessons focused on programming fundamentals and exam technique.

KEY PROJECTS

Automated Chaos Resilience Platform (ACRP) - Final Year Dissertation

2024 - 2025

- Led the architectural design of an air-gapped, on-premise Chaos Engineering platform, configuring a local network using Cisco switches to simulate a highly secure, isolated environment.
- Oversaw the deployment of a fully self-hosted GitLab CI/CD pipeline completely off-grid, enabling safe infrastructure testing without any external network dependencies.
- Integrated a local Llama 3 8B AI model to analyse Out-of-Band switch logs and auto-generate Root Cause Analysis reports for Layer 1/2 switch failures.

- Built a dynamic SRE control panel to orchestrate fault injection and display real-time system analytics across the platform.

Home Network Lab - Personal

Ongoing

- Configure and manage an enterprise grade home network using an Orbi router with dual SIM and dual ISP failover, ensuring network redundancy and continuous connectivity.
- Actively configure Cisco switches connected via laptop for hands-on practice of VLANs, routing, switching, and network management.
- Run a three-machine Linux homelab for learning Kubernetes, Docker, monitoring, and infrastructure automation.

Kairo London - E-Commerce Front-End - Freelance Contribution

2023

- Contributed responsive, pixel-perfect UI components to a live commercial e-commerce platform (kairo.london), translating high-fidelity design mockups into production-ready code.

Pulse - Async Messaging Protocol - Personal Project

2024

- Built a peer-to-peer messaging application in Python using Twisted and sockets, gaining practical knowledge of low-level asynchronous networking protocols and packet transmission.

EDUCATION

BSc (Hons) Computer Science with Placement - City St George's, University of London *Sep 2022 – May 2026*

- Awarded BSc (Hons) Computer Science with Placement - Class II Upper Division (2:1). Overall mark: 68.7%. Date of award: 23 June 2026.
- Final year highlights: Individual Project (81.3%), Theory of Computation (81.8%), Data Visualisation (80%), Project Management (70.5%). Professional Placement (73%).
- Year 1 modules: Introduction to Algorithms, Mathematics for Computing (78.6%), Systems Architecture, Programming in Java, Operating Systems, Computer Science Ethics and Society, Databases.
- Year 2 modules: Data Structures and Algorithms, Language Processors, Computer Networks, Object-Oriented Analysis and Design, Cloud Technology for Business Transformation, Team Project, Programming in C++.
- Final year dissertation: Automated Chaos Resilience Platform, an independently designed AI-powered infrastructure system demonstrating Chaos Engineering, CI/CD, networking, and SRE principles.

A-Levels - Walthamstow Academy Sixth Form

Sep 2020 - Jul 2022

- Mathematics (B), Physics (B), Computer Science (B).

GCSEs - Walthamstow Academy

2015 - 2020

- Spanish (9), Mathematics (8), Biology (7), Computer Science (7), Chemistry (6), Religious Education (6), Physics (5), English Language (5), English Literature (5).
- GCSE examinations cancelled due to Covid-19. Final grades awarded through teacher-assessed grades based on consistent classwork and mock performance throughout the year.

CERTIFICATIONS

- **Microsoft Certified: Azure Fundamentals (AZ-900)** - Microsoft, May 2025
- **Fundamentals of DevOps** - KodeKloud, Jun 2025
- **12 Factor App** - KodeKloud, May 2025
- **AWS Cloud Practitioner** - Amazon Web Services, Aug 2024
- **Learning ITIL v4** - LinkedIn, Sep 2024
- **CS50 AI with Python** - Harvard University (in progress), 2026

AVAILABILITY AND ADDITIONAL INFORMATION

Available immediately for full-time employment. Fully open to relocation anywhere within the UK, Europe, GCC, or internationally including Saudi Arabia and UAE. No notice period required.
